PANORAMIC FABRICS

AN INNOVATIVE CONCEPT

Artwork from the GALERIE collection come to life

This new concept of panoramic fabrics, deployed in panels to be stretched or draped, is completely innovative in terms of the width of the print, which has never been equalled by Pierre Frey. It includes five of the most incredible designs previously published in the GALERIE wallpaper collection. Greenery, typical of 17th and 18th century Aubusson tapestries, a work done in Indian ink printed lightly on a fine linen voile, a contemporary canvas with brightly coloured brushstrokes, a brush painting of a landscape in the south of France, or a realistic drawing of an exotic scene, all have been drawn by artists and are true works of art.
